WAR IS HELL.
AIDS IS WORSE.

AIDS is a slow, tortuous killer that attacks the body's immune system,
making the victim totally defenseless against disease.
You can survive a war, but you can't survive AIDS.

If you'd like to know more about AIDS you can get helpful, confidential information by calling the National AIDS information line, 1-800-342-AIDS. We also encourage you to contact a VA Medical Center or Vet Center for additional information.
